A Multi-function printer, playing two roles

There has been realized switching with a touch between the functions of a hand labeler and a desktop printer. The machine is available for labeling and continuous printout, making bar code labels. Make better use of it at your convenience or in any circumstances.

An Exciting Work Shop, having an easy operating

Larger are keys for everybody to use it simply and correctly. The 16 digits display operating messages in an interactive mode.

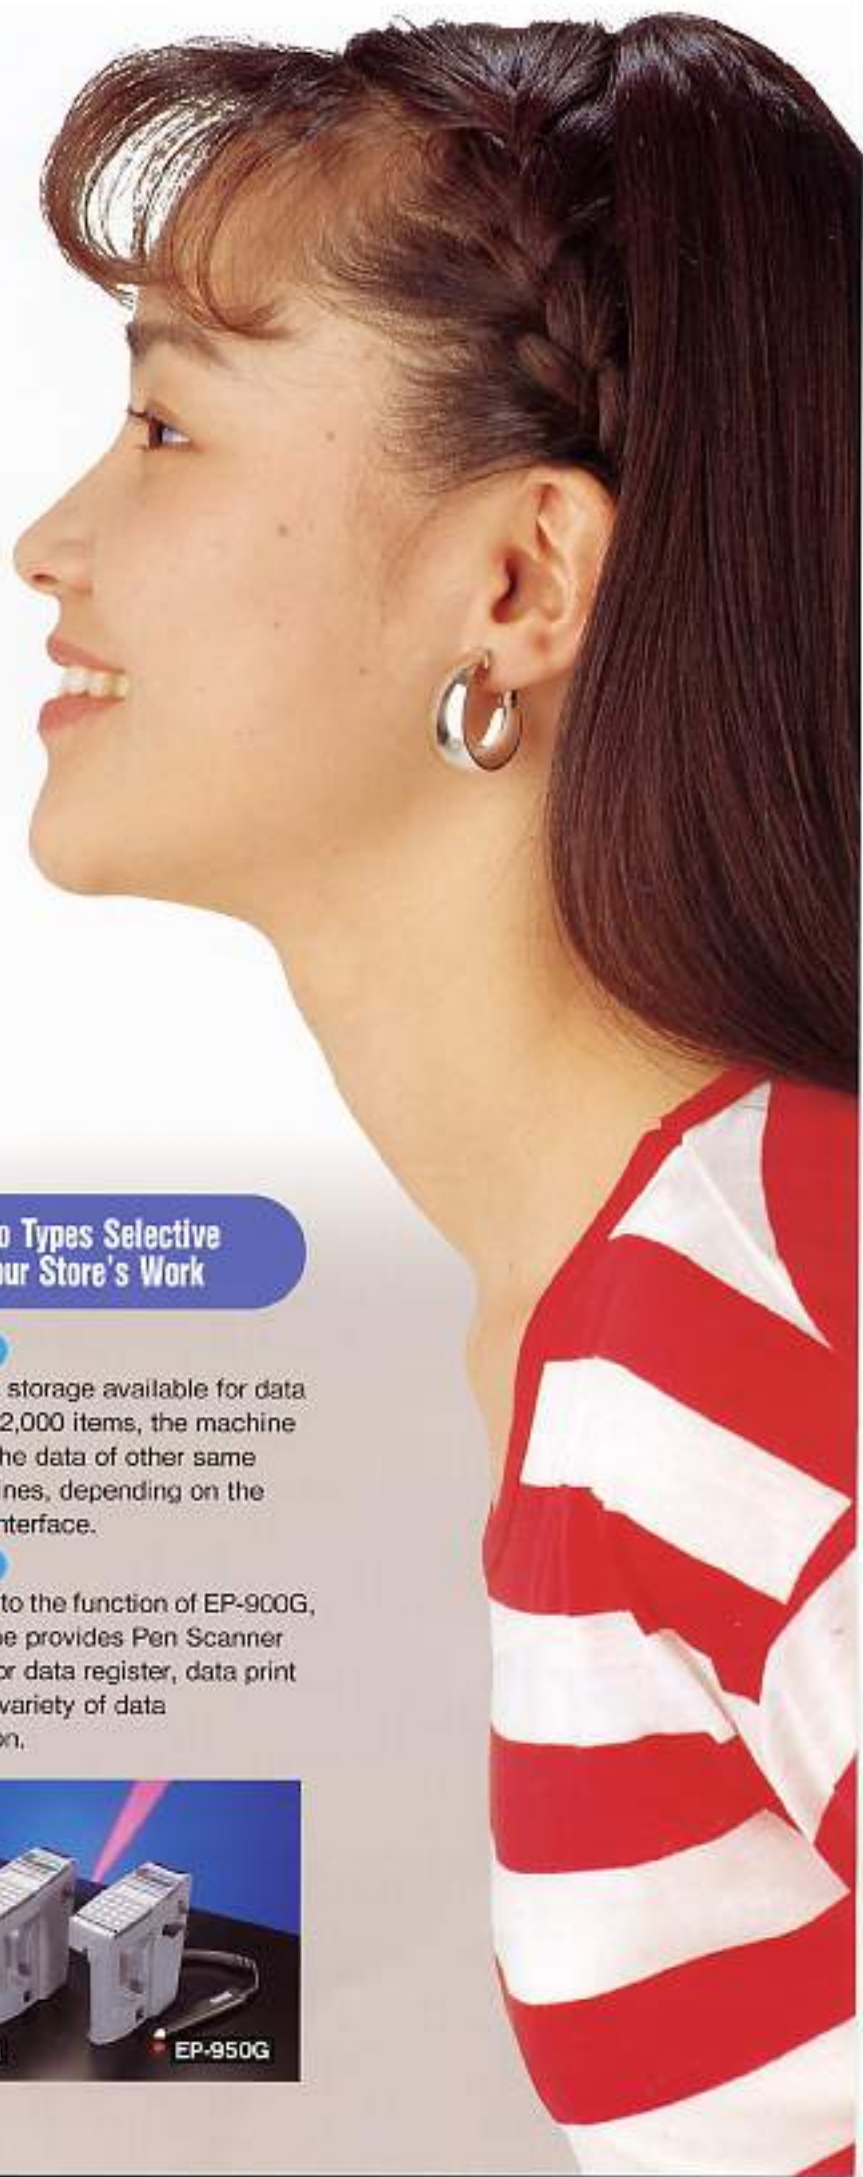

Standard Equipment of Data Telecommunications Function

The RS-232C interface makes it available the data transmission between the machines. Moreover, the EP-950G is available for pen-scanner.

This printer will work certainly to cope with change of distribution system. EP-900G/EP950G printer taking two roles at a time: printer's function can be switched to the labeling's function. Designed as light and compact, the machine can store the date up to 2,000 items, copy the data between the same type of machines, and increase more the working efficiency. Furthermore, it becomes available exchanging data by RS-232C interface and connecting the barcode scanner (EP-950G).

Battery Volume Display

A trouble happens in a busy time, that is the battery used up. To avoid such a trouble the switch-on display will let you know the battery volume.

Two Types Selective Your Store's Work

EP-900G

Having the storage available for data register of 2,000 items, the machine can copy the data of other same type machines, depending on the RS-232C interface.

EP-950G

In addition to the function of EP-900G, the machine provides Pen Scanner available for data register, data print out, and a variety of data transmission.
